

CONSTRUCTION & ENGINEERING

Baseline Custom Fabricating Ltd,

I have had over 5 years of business relations with BCF without any issues, our continuous relationship grows every day from a small none detailed project to the most intricate project, they always seem to amaze me with their fine eye to detail and their willingness to go a step further to help with making the project run smoother, hassle free and on time for very tight time lines,

They always seem go above and beyond from there quick response to a quote request, to needing a delivery on short notice, to requesting a welder on site, to requesting a new fabrication detail or steel fabrication they always make sure my requests are met without hesitation.

With the Constant changes in steel and zinc prices always fluctuating, BCF stays on top of these changes and makes sure these are distributed in there quote, so when receiving a price for a project you know you're getting the Best price at that time based on the economy

I look forward to many more years of business between Sentrex and BCF

Sincerely,

David Attard

Project Manager
